

A little over two years ago, I was in Arizona for a match when my shooting horse went down from dehydration. When we travel, he has always been picky about the water he drinks. I went to one of my local feed stores; Paul's Vet Supply and consulted the matter with Paul. He suggested we use Gateway Products' electrolyte powder to mix in Roy's grain once a day, every day. We gave it a try and it works great!

Since then, I haven't had any problems with Roy. He has stayed hydrated and fit as well as always being ready for competition. In 2010, Roy and I won the SASS Overall Mounted Shooting World Championship title. Thanks so much to Gateway for your great products that keep my Roy in great condition for competition. Roy and I will never be without it!
